What’s in the bag

- Data Projector
- Laptop Computer
- Instruction Manual or AV Instructional Guide
- Video cable
- Power cords
- Remote control* 

Care

- Always allow fan to cool projector before unplugging
- Always carry the equipment by the handle.

Get familiar with these parts of the Equipment

- LCD and Open/Close
- Volume Controls
- Power Status Indicators
- Dual Display mode for your laptop

- Not always available
Basic Operation – Connecting a Data Projector to a Laptop

Setup
Step 1 Connect one end of the video cable to the Computer input on the data projector. Connect the other end of the cable to the video port on the laptop.
Step 2 Connect the power cords to the laptop and the data projector, and plug each into an electrical outlet.
Step 3 Power ON the data projector, by pressing the ON/Standby button.
Step 4 Power ON the laptop. When the laptop is booted, the image should display on the laptop and a projected image from the projector.
Step 5 If no image is projected: Enable Dual Display Mode. On a Dell laptop to enable dual display hold down the function key FN and press F8. Dual Display mode function can vary. You may need to consult your Laptop user’s manual. If still no image, repeat this step again.
Step 6 If using Audio from the projector; connect one end of the audio cable to AUDIO IN on the projector, and the other end into the laptop. Adjust the volume on the projector.

Shut Down
Step 1 Press the ON/Standby button to power off the projector. The Projector will display “Please wait, to shut down. Leave the power cord of the projector plugged into the electrical outlet to allow the fan to run and cool the projector. This should take 1-2 minutes.
Step 2 Close all applications on the laptop, save your work if necessary, shutdown and power off the laptop.
Step 3 When the projector fan has stopped running and the projector has cooled, disconnect the video cable from laptop and the projector.
Step 4 Unplug the power cord from the electrical outlet. Remove the power cord from the projector.
Step 5 Place items in carry cases: Check contents and place items in the appropriate carry case.

Operating Tips
✓ Moving the projector closer to the screen reduces projected image size. Moving further away from the screen increases the size.
✓ Audio output rom the projector can be limited. To enhance audio output, external speakers can be connected to the projector or to the laptop.
✓ Re-focus the projector whenever it is moved.
✓ Always safely remove USB devices before removing from computer.

Advanced Features/Instructions
✓ Connecting external amplifier/speakers.
✓ Connecting a DVD/VCR.

Troubleshooting

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>No Image projected</td>
<td>Check that projector is ON. Check for proper cable connections. Check if dual display mode is enabled.</td>
</tr>
<tr>
<td>Projector is on, but no light is coming from the projector.</td>
<td>Return the equipment immediately to the AV Technician for troubleshooting.</td>
</tr>
</tbody>
</table>

Training
If you would like to book a training session, please call the Audiovisual Technician at the campus nearest you to setup an appointment.
