You will practice creating a full reference and in-text citation in APA format for one of the articles we looked at today.

➔ See below for an example of a full reference and an in-text citation for a scholarly journal article. It includes a snapshot of part of the first page of the article so that you can see how to arrange the key pieces of information you find in an article into a citation.

➔ Turn over the page for a snapshot from another article. Use the information that you see to create a full reference and an in-text citation. For the in-text citation, pretend that you are directly quoting text from page 289 of the article.

Example of complete reference and in-text citation for a journal article:

Full Reference:

In-text Citation for a direct quotation taken from page 850 of the article:
(Moon, et al., 2011, p. 850)

TIP: For items that have two authors, you list both of the authors in your reference and in-text citation. When there are more than two authors, you only list the first one, plus the Latin term et al. (meaning “and others”). For your full reference, you list ALL of the authors if there are up to twenty authors.

For more help with APA citations, check out the library’s guide: https://libguides.kpu.ca/apa

Created by Chris Burns (KPU Criminology Liaison Librarian, January 2020)
Now you try it for this article:
Create a full reference, and an in-text citation for a direct quote from page 289. Write your answers below.

Tests of Theories of Crime in Female Prisoners: Social Bond and Control, Risk Taking, and Dynamic Systems Theories

Marc A. Lindberg¹, April Fugett¹, Ashtin Adkins¹, and Kelsey Cook¹

1. In-text citation: ________________________________________________________________

2. Reference citation: Don’t bother double-spacing the reference in this exercise, though you usually would do so. Underline information that would usually be in italics.

______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________
______________________________________________________________________________
